

VINOTH R

Chennai, India | 9360265182 | vinotamil2003@gmail.com | github.com/Vinoth-R-2003 | <https://vinoth-r-2003.github.io/Portfolio/>

PROFESSIONAL SUMMARY

Highly motivated and detail-oriented engineering graduate with strong technical foundations in Python, Java, SQL, and database management systems. Proven capability in data analytics, automation scripting, and developing full-stack academic solutions through hands-on project and internship experience. A quick learner and analytical thinker eager to leverage problem-solving skills, technology frameworks, and structured thinking to contribute effectively to entry-level software development, technology, or analytical roles.

TECHNICAL SKILLS

Programming: Python, Java

Analytics Concepts: Pandas, NumPy, Data Cleaning, EDA

Data Visualization & Tools: Power BI, Matplotlib, MS Excel, Jupyter Notebook, VS Code, Git/GitHub

Database Management: MySQL

EDUCATION

B.E. Computer Science and Engineering

Velammal Institute of Technology, Chennai

CGPA: 8.30

Higher Secondary Certificate (HSC) & Secondary School Leaving Certificate (SSLC)

Chennai Boys Higher Secondary School, Saidapet, Chennai

HSC: 82.02% | SSLC: 82%

CERTIFICATIONS

- Python for Data Science - NPTEL
- Artificial Intelligence Fundamentals - IBM

INTERNSHIP EXPERIENCE

Technical Intern - VCODEZ, Chennai

April 2025 - July 2025

- Performed deep data analysis on 15+ real-time project datasets, extracting KPIs to support executive decision-making.
- Developed 10+ Python automation scripts using Pandas to streamline workflows, reducing manual processing time by 25%.
- Collaborated with a cross-functional team validating data integrity across relational tables to ensure 98% reporting accuracy.

PROJECTS

Crop Yield Prediction

Python, Pandas, Scikit-learn, Random Forest Regression

- Engineered an end-to-end ML model predicting regional crop yields from historical datasets (50,000+ records).
- Improved model accuracy to 93% through data cleaning, imputation, and feature engineering.
- Identified key environmental factors impacting harvest volumes.

GreenGrow - Smart Agriculture Platform

Python, Django, MySQL

- Developed a full-stack platform with structured MySQL schema for 10,000+ agricultural data points.
- Optimized database indexing and SQL queries, boosting retrieval speeds by 30%.
- Built scalable backend infrastructure for predictive AI plant health reporting.

Movie Recommendation System

Python, Pandas, Scikit-learn

- Created a content-based recommendation system analyzing 5,000+ movie metadata entries.
- Applied TF-IDF and Cosine Similarity to generate accurate user recommendations.
-

Unit-tested the data pipeline ensuring seamless, low-latency recommendation delivery.
